Family of Products:

**Florajen Digestion** (Formerly Florajen3)
Multiculture blend of probiotic strains that aid in the healthy functioning of the digestive tract.*

**Florajen Women**
Multiculture blend of probiotic strains that aid in maintaining the healthy balance of vaginal flora.*

**Florajen Kids**
Multiculture blend of probiotic strains beneficial for digestive and immune health in kids starting at 6 months of age.*

**Florajen Acidophilus**
An extra high potency, single culture probiotic that can be helpful in maintaining everyday health.*

---

Technical Information:

Every Florajen capsule contains freeze-dried strains of live cultures. One capsule equals the probiotic culture in over 10 cups of fresh yogurt.

Survivability:
- All Florajen Probiotics are stomach acid resistant + bile tolerant making them well suited for intestinal survival.
- Strains are able to be released in the intestinal tract to ensure lining of the gut.

Safety:
- Allergen-free: does not contain milk, eggs, fish, crustacean shellfish, tree nuts, peanuts, wheat, or soy.
- Free of gluten, dairy, coloring, and preservatives. Non-GMO, Kosher.
- Proven safe for human consumption.
- Manufactured in the USA in GMP-certified facilities.

Storage:
- Florajen maintains a Cold Chain Commitment™ meaning that from the time our probiotics are manufactured, delivered to the pharmacy, and placed in the hands of a patient, Florajen is kept cold. This allows the cell counts within Florajen Probiotics to remain as potent and consistent as possible through the expiration date.
- Florajen should be kept refrigerated (35.6° to 46.4°F or 2° to 8°C) at all times. Florajen can be stored at room temperature for up to two weeks and still maintain effectiveness.
- Prior to opening the bottle’s safety seal, Florajen may be stored in the freezer (-13° to 14°F or -25° to -10°C).

Packaging:
- Each white plastic bottle contains 30 or 60 capsules, with a rayon plug and desiccant to absorb moisture.
- Each bottle has a tamper evident body shrink wrap, safety seal on bottle, and is boxed with a lot number and expiration date.

Capsules:
- Florajen Digestion, Florajen Women, and Florajen Acidophilus are pharmaceutical grade gelatin capsules.
- Florajen Kids are vegetarian capsules.
- Capsules can be opened and sprinkled into cold food or beverage.

Florajen® products contain bacteria strains that have demonstrated potent probiotic benefits across many areas*

**SCIENTIFIC LITERATURE REPORTS:**

**Bloating:**
- Reduces bloating associated with functional bowel disorder

**Constipation:**
- Reduces constipation
- Increases frequency & ease of bowel movements

**Diarrea:**
- Reduces incidence & episodic frequency of diarrhea
- Reduces risk of diarrhea & fever
- Provides protection against traveler’s diarrhea

**Cold & Flu:**
- Significant reduction of incidence of fever
- Significant reduction of incidence of upper respiratory infection

**GI/Colon Health:**
- Reduces incidence & duration of respiratory infection
- Improves colon health by shifting predominant bacteria and production of short-chain fatty acids of fecal microbiota

**Immunity:**
- Improves GI health & well-being
- Improves immune system function
- Strengthens body’s natural defense
- Offers immune function benefits
- Significant reduction in fever occurrence

**Eczema/Atopic Sensitization:**
- Lowers development of eczema/atopic sensitization
- Significantly reduces eczema
- Reduces symptoms of atopic dermatitis

**Allergens:**
- Significantly reduced rhinoconjunctivitis

**Lactose Intolerance:**
- Enhances tolerance & improves lactose digestion
- Reduces incidence of upper respiratory infection

**Women’s Health:**
- Reduces urinary tract infections
- Reduces vaginal tract infections
- Helps restore the balance of vaginal flora
- Helps maintain a healthy vaginal pH
- Reduces GBS colonization
