Recommended Usage

- Patients may take 1 capsule daily with or without food
- Patients may take additional daily capsules based on healthcare professional recommendation

For Patients Taking Antibiotics

- Patients taking an antibiotic should take Florajen at least 1 to 2 hours before or after their antibiotic prescription
- Patients should continue taking Florajen for at least 2 weeks after completing their prescribed course of antibiotics

For Patients Who Are Unable to Swallow Capsules

- Any Florajen Probiotic capsule, including Florajen Kids, can be opened and sprinkled into cold food or beverages

Refrigerated for Freshness + Potency

Florajen guarantees potency and consistency of our probiotics, due to our Cold Chain Commitment™, meaning that from the time our probiotics are manufactured to when they are placed in the hands of a patient, Florajen is kept cold.

Florajen can be stored at room temperature for up to two weeks and still maintain effectiveness.

Patients can ask their pharmacists for Florajen Probiotics, found in the pharmacy refrigerator.
