## Probiotics

**Florajen<sup>®</sup>** | For antibiotic side effects  
+ potent probiotic benefits  
Probiotics

### Why should someone take Florajen Probiotics?

Many people take Florajen every day, while others take Florajen whenever they feel their digestive system needs a boost. Two of the main reasons to take Florajen Probiotics are to help ease the unpleasant side effects of antibiotics and to help maintain everyday health.\*

Antibiotics don't discriminate between good and bad bacteria. They kill both and disrupt the body's natural intestinal and vaginal balance. Florajen Probiotics help restore the good flora and maintain the natural microbial balance your body needs to stay healthy, allowing you to feel better while you're getting better.\*

### All Florajen Probiotics are:

- Formulated with proven safe and effective strains.
- Stomach acid resistant + bile tolerant.
- Refrigerated for freshness + potency.
- Allergen-free: does not contain milk, eggs, fish, crustacean shellfish, tree nuts, peanuts, wheat, or soy. Free of gluten, dairy, coloring, and preservatives. Non-GMO, Kosher.
- Manufactured in the USA in GMP-certified facilities.

**One capsule of Florajen equals the probiotic culture in over 10 cups of fresh yogurt**

### What are probiotics and how do they work?

Our bodies have a balance of "good" and "bad" bacteria. When "bad" bacteria outweigh the "good," we can feel unwell. In order to restore that balance, supplemental "good" bacteria can help. Probiotics are live, "good" bacteria that help keep your body healthy. Probiotics help renew the normal friendly bacteria that has been lost.\*

### Why are Florajen Probiotics refrigerated?

Probiotics are live bacteria, and when left unrefrigerated the cells naturally die off at a faster rate. Florajen maintains a Cold Chain Commitment™ meaning that from the time our probiotics are manufactured, delivered to the pharmacy, and placed in your hands, Florajen is kept cold. This allows the cell counts within Florajen Probiotics to remain as potent and consistent as possible through the expiration date.

- ✓ Founded by bacteriologists over 25 years ago
- ✓ Help avoid the unpleasant side effects of antibiotics
- ✓ Effective, affordable options with the right strains at the right cell counts
- ✓ Refrigerated for freshness + potency

## About Florajen®

### Established:

Founded by bacteriologists over 25 years ago, Florajen Probiotics provide effective, affordable options to help you avoid the unpleasant side effects of antibiotics. It's a great everyday probiotic too!

### Affordable:

Florajen Probiotics are a cost effective solution with 4 formulations each costing under \$20 for a month's supply. When compared to leading competitors, Florajen Probiotics provide the best value.

### Effective:

Florajen Probiotics contain high cell counts to deliver a level of potency with real and significant health benefits. They restore the good flora and maintain the natural bacterial ratio the body needs to stay healthy, particularly in the digestive and vaginal tracts.\*

### Refrigerated for Freshness + Potency

Florajen maintains a Cold Chain Commitment™ meaning that Florajen Probiotics are continuously refrigerated for potency from time of manufacture through time of purchase. Upon purchasing Florajen you should keep it refrigerated whenever possible. Florajen can be stored at room temperature for up to two weeks and still maintain effectiveness.

**Ask your pharmacist for Florajen Probiotics,  
found in the pharmacy refrigerator.**
